

Serial Numbers for KB AC & DC Drives

KB has been applying Serial Numbers to all of its products since June 1996. The Serial Number consists of a product code, date of manufacture and a unique number to identify each speed control. The 9 digit Serial Number is made up as follows:

*PRODUCT CODES AND LOCATIONS OF SERIAL NUMBER

CODE	PRODUCT	LOCATION	CODE	PRODUCT	LOCATION
26	KBIC	On top of IC1	39	KBMG	On heatsink below trim pots
28	KBPC	On top of IC2	41	KRPI	On top of IC2
30	KBCC	On top of IC2	45	KBEP	On top of IC1
31	KBTC	On top of IC1	46	KBWD	On top of IC1
32	KBSI	On T1 transformer	46	KBWT	On top of IC1
33	KBMD	On top of IC2	48	KBET	On top of IC1
37	KBMM	On top of IC2	49	KBWM	On top of IC2
38	KBAP	On top of IC1	67	KBVF	On top of Buss Capacitor
39	KBRG	On top of RY1 relay			

The Serial Number is applied to a white label (4 x 17 mm). This label is affixed to each control in the locations shown above. If you have any questions please feel free to call your Applications Engineer or Regional Manager.

Sincerely,

William A. Fey
Applications Engineer
